5

6       (065) The invention is a method of on-line credit information monitoring  
7       and control. In detail, the method includes the steps of. 1) accessing  
8       the credit information by means of a computer system in a computer  
9       network; 2) providing the information to the individual by means of the  
10      computer system in the computer network; 3) providing for the individual  
11      to request changes in the information; and 4) informing the individual of  
12      the completion of the changes in the information.
